

STAINSTOP

Protects against common water-based stains

STAINSTOP is a new dirt repellent fabric treatment for window blinds that offers superior protection from the most common household water-based stains like cola, fruit juice, tea, milk, coffee, vinegar, mud, honey etc.

STAINSTOP offers many advantages:

- makes fabric window blinds look new for a longer period of time
- effectively repels water based liquid stains
- enables easy cleaning
- offers added protection for humid rooms like kitchens and bathrooms
- environmentally friendly

Plissé/Roller/Vertical Blind Fabrics

STAINSTOP

Without STAINSTOP

The invisible protective treatment does not affect any of the decorative and functional characteristics of the fabric.

STAINSTOP has been developed with sustainability in mind and is OEKO-TEX® certified. This reassuring industry acknowledgement ensures that no harmful chemicals have been used in the production process of fabrics, keeping homes healthier and safer.
